Pranjay Guleria

Ex-Product Manager @Antino | Bennett University
Greater Delhi Area

Summary

Ex-Product Manager at Antino with experience in analytics-driven product development, KPI tracking, stakeholder management, and building data-driven solutions across healthcare, edtech, and EV domains. Incoming Master of Data Science student at RMIT University, Melbourne, transitioning into Data Science and AI with strong interests in Machine Learning, intelligent systems, analytics engineering, and end-to-end ML applications. Skilled in Python, SQL, Power BI, data wrangling, exploratory data analysis (EDA), predictive modeling, and full stack development. Currently focused on building real-world AI/ML systems involving FastAPI, Streamlit, MLflow, and deployment workflows. Passionate about combining software engineering, product thinking, and data science to build impactful and scalable intelligent applications.

Experience

Antino

2 years 10 months

Product Manager

November 2024 - April 2026 (1 year 6 months)

Gurugram

1. Led the software development for India's first integrated GMR EV charging infrastructure for airlines and ground handling at RGIAirport, Hyderabad—supporting 58 GSE charging points across 2,000+ sq. meters. Oversaw the design and implementation of the real-time monitoring and predictive maintenance system, enabling seamless charger management, in collaboration with Celebi and GlobeGround India, with the entire system powered by renewable energy.
2. Led the development of the Oakridge School App (Nord Anglia Education Group), overseeing end-to-end implementation of the Driver and Permission Slip modules for both iOS and Android platforms. Collaborated directly with stakeholders to gather requirements and created detailed Data Flow Diagrams

(DFDs) using Miro and FigJam to ensure shared understanding. Proposed and led the integration of NFC functionality in the Driver module, reducing human error rates by over 35% and delivering value to 10,000+ users across the school franchise.

3. Built and deployed a Python-based JIRA Analytics & Reporting System on PythonAnywhere, automating KPI tracking for 10+ teams and reducing manual effort by ~90%, saving approximately 10 hours per week. Integrated dynamic charts and automated email reports with real-time time-tracking insights, enabling higher management to monitor project health instantly.

4. Led the full Software Development Life Cycle (SDLC) for Spare Space (www.sparespace.co.in), India's first dedicated marketplace for short-term creative space rentals. Architected and launched a scalable platform connecting space owners with over 10+ categories of creators (photographers, fitness instructors, corporate teams), formalizing the unorganized hourly rental market. Spearheaded the design of high-integrity booking workflows, secure payment integrations, and a dual-interface dashboard for hosts and seekers, fostering a reliable ecosystem for innovation and collaboration across India.

Associate Product Manager

January 2024 - November 2024 (11 months)

Gurugram, Haryana, India

1. Spearheaded the successful delivery of 7 client projects by driving cross-functional collaboration, leveraging Agile methodologies (Scrum & Kanban), and utilizing JIRA for streamlined project tracking—resulting in consistent on-time completions.

2. Optimized product development processes by creating detailed Data Flow Diagrams (DFDs) and User Flow Diagrams in Miro, enhancing clarity across teams and improving communication with stakeholders.

3. Played a key role in pre-sales engagements by gathering client requirements and translating them into comprehensive technical documentation (FRD, BRD, PRD) for 10+ projects, ensuring alignment between business goals and technical execution.

Product Manager intern

July 2023 - January 2024 (7 months)

Gurugram, Haryana, India

1. Participated in pre-sales calls with stakeholders to gather requirements and convert them into structured feature lists, aiding accurate project timeline and effort estimation.
2. Created Data Flow Diagrams (DFDs) for 15+ projects to map out system workflows and ensure shared understanding across teams.
3. Drafted key product documentation—including BRD, PRD, and FRD—based on gathered requirements to align business objectives with technical solutions.

Cisco
Cyber Security
May 2022 - June 2022 (2 months)
India

the LEGO Group
Student
July 2014 - July 2014 (1 month)
Troy, New York, United States

Participated in the LEGO ROBOTICS ENGINEERING ACADEMY on the 25th day of July 2014

Education

Bennett University
Bachelor of Technology - BTech, Artificial Intelligence · (2020 - 2024)

Troy Middle School , New York
· (September 2014 - June 2015)
